Ready for an interesting rabbit hole, boys?

>James Biden, bro of Joe Biden gets an amazing land deal for Water Island from a lobbyist while Joe was VP. The land was in the Virgin Islands, and after some digging, we see it is barely a STONE'S THROW from Epsteins Island

THREAD

>Find out that Water Island is right across from a submarine base. Base consists of extensive military bunkers, tunnels in the area leading up to the 1950s. It's then leased from the government to private entities for a mere \$3,000 a year. What a deal!

This goes on until the 1990s where "archaeological digs" are then given the green light.

Ghislaine Maxwell is introduced at the UN as someone who "controls the oceans around the world" through TerraMar company (originally funded by The Clinton Foundation).

Surface scratched.

You can register to become a "citizen" of this Terramar epstein island (might have been part of the blackmailing process?)

Perhaps land deals are part of the process as well, i would imagine
Maxwell delivers speech talking about her operating and owning submarines

Maxwell talks in her speech of underwater mining and digging, led private sub tours and talks.

Neighbors in the area of where James Biden purchased this plot of land talk about submarines smuggling children in and out (video below)

Anons digging through archives to find more information on the extent of the operation on the island leading up to today

Who else had been given deals for water island, who else has property there, what are the extents of the tunnels/bases/submarine channels/docks?

Thought I would highlight that.

Sustainable Oceans Alliance: Impacting the SDGs

Commitment by The TerraMar Project

In 2013, the Sustainable Oceans Alliance (SOA) committed to mobilize the international community and the public at large on the importance of the Oceans and the Seas and to ensure that the 193 Member States of the United Nations recognize and incorporate oceans in the Sustainable Development Goals, to be adopted in 2015. This two pronged approach will mobilize Member States of the United Nations to include Oceans in the SDGs and the global campaign will engage citizens around the world to have a say in the effective and efficient management, and preservation of oceans and seas. By including Oceans and Seas in the SDGs, governments will be able to develop national plans and strategies for the protection of the oceans. One of the overarching goals of the Alliance is to build a coalition of the broad range of actors in this field and provide a unified voice to bring about more cohesion in the balance between humans and marine life.

Will update with relevant information. This gets weirder and weirder.

Can dead men tell tales?

Yes, from a USB flash drive.

2020 is set to be a possible a possible Paradigm Shift. Can they take the truth away from us twice? Who will the dead man's switches notify? Who gets exposed?

Let's hope we find out.
